

Welcome Families ☺ ☺

We are excited to announce a unique learning opportunity for your child called *Treble Makers!* This very fun and easy to understand curriculum is designed with children ages 3-7 in mind. The *Treble Makers!* beginner piano music teaches children to read real music notes and to play them on real keys from the very start. While the color coding guides them, the kids are actually seeing and playing real music. These beginning piano lesson plans allow children the opportunity to both read and perform music at a younger age.

The benefits of music education for children are numerous and can last a lifetime. A piano at home is **not** required, as this class is designed to allow children to explore their interest before a family makes such a large investment. However, if your family already owns an instrument, excellent! While home practice is not required, it is indeed encouraged. We now offer online classes for interested families as well...which would require an instrument at home.

The only prerequisite for this class is a child's ability to recognize colors, and follow simple instruction from their teacher. For our youngest learners, a pre-piano class will be offered. It will teach them about the piano while keeping things on a developmentally appropriate level.

We will be conducting **free evaluations** over the next few weeks to determine each child's interest and ability. We will send home a letter after the evaluations to let each family know if your child is interested and developmentally ready to expand their musical talents.

Lessons will be given during and/or after school hours, depending on your school's preference. A schedule will be sent home including day and time of lessons once enrollment closes. We strive to create a schedule to meet the needs of each participating family.

Students will be paired together according to their ability. More details will be sent home with each student after all the evaluations are complete. Please complete the form below and return to your child's teacher as soon as possible. If you have any questions, please do not hesitate to contact me.

Joyfully His,
"Mrs. Tracey" Messick
